In addition to an awareness and understanding of cyberbullying and its consequences, this presentation provides interventions and best practices to use to prevent cyberbullying and practical steps to take when it does occur. This presentation is highly informative, relevant and interactive.

- Interventions to prevent conflict from escalating
- How to help kids build positive relationship habits both online and offline
- Practical steps to deal with bullying situations
- Strategies to help empower your students
- How cyberbullying takes shape
- Real life examples
- Psychological harm
- Recognizing the warning signs
- Unique characteristics of cyberbullying
- How to respond and help the victim of bullying/cyberbullying
- Strategies to empower and engage bystanders
- Challenging online social norms
- Best practices prevention and intervention
- Legal issues related to cyberbullying and cyberthreats
- Comprehensive school and community approaches

Research continues to show that school staff are often unaware of the extent and frequency of bullying incidents and it's easy for adults to downplay the seriousness of bullying incidents that do occur. Research also shows that rates of bullying drop significantly when all staff members are able to identify the signs and agree to intervene consistently. The following presentations give educators a clear awareness of what cyberbullying is and specific prevention and response strategies to draw on.

SPEAKER · COUNSELOR · WORKSHOP FACILITATOR
